## PROFESSIONAL SUMMARY

Results-driven Software Engineer with professional frontend experience at Hackveda and extensive expertise building production-ready, full-stack web applications. Proficient in React.js, Node.js, Express.js, MongoDB, RESTful API architecture, JWT authentication, and cloud deployment pipelines. Demonstrated ability to optimize database query performance, implement secure role-based access control, and engineer responsive, high-performance user interfaces.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), HTML5, CSS3

**Frontend:** React.js, Tailwind CSS, GSAP, Context API, Responsive UI Design, Component Architecture

**Backend:** Node.js, Express.js, REST APIs, Middleware Architecture, Mongoose ODM

**Databases:** MongoDB, MySQL, CRUD Operations, Indexing

**Security & Auth:** JWT, OAuth 2.0, Role-Based Access Control (RBAC), Input Sanitization, Password Hashing

**Tools & Cloud:** Git, GitHub, Postman, VS Code, Vercel, Render, ImageKit CDN, CI/CD Workflows

**Core CS:** Object-Oriented Programming (OOP), Data Structures & Algorithms, REST Architecture, Agile

## PROFESSIONAL EXPERIENCE

### Frontend Developer

May 2025 – Aug 2025

Hackveda

India

- Engineered responsive, cross-browser user interfaces using React.js and Tailwind CSS, reducing page bounce rates by 18%.
- Created a modular component library across 8+ views, accelerating feature development turnaround time by 30%.
- Integrated frontend state management with backend REST APIs via Axios, ensuring seamless handling of 100% of JSON payloads.
- Accelerated page load speeds by 25% by optimizing DOM rendering cycles and minifying static assets, lifting Lighthouse scores to 90+.
- Collaborated in 2-week Agile sprints using Git/GitHub for branch management and code reviews.

## PROJECTS

### Hospital Management System

[GitHub Code](#) | [Live Demo](#)

Tech: MongoDB, Express.js, React.js, Node.js, JWT, Tailwind CSS

- Architected a full-stack healthcare platform serving 3 user roles (Patient, Doctor, Admin) with secure end-to-end appointment workflows.
- Implemented stateless JWT authentication and custom middleware, securing 12+ API endpoints against unauthorized access.
- Constructed an automated appointment booking pipeline, reducing patient scheduling latency by 35%.
- Engineered an administrative dashboard to manage and analyze data across 50+ doctor profiles and real-time patient queues.

### Car Rental Platform

[GitHub Code](#) | [Live Demo](#)

Tech: MongoDB, Express.js, React.js, Node.js, ImageKit, Vercel, Render

- Spearheaded development of a vehicle rental web application featuring dynamic filtering, availability algorithms, and automated booking.
- Designed and deployed 15+ REST API endpoints handling transactional data, inventory states, and admin operations.
- Integrated ImageKit CDN for cloud media optimization, compressing vehicle image payloads by 40% and decreasing load times.
- Automated production continuous deployment using Vercel and Render with isolated environment security configurations.

## EDUCATION

### Madhyanchal Professional University

Bhopal, India

Bachelor of Technology in Computer Science Engineering (CGPA: 7.5/10)

2022 – 2026

## CERTIFICATIONS

MERN Full Stack Development Certification – Sheryians Coding School (2025)

## ACHIEVEMENTS

**Smart India Hackathon (SIH 2024):** Selected as a national finalist among thousands of engineering teams to build automated software solutions.
